

The Maldives

Resort Suggestions:

- Soneva Fushi and Jani
- Six Senses Laamu
- Gili Lankanfushi

Activity Highlights:

- Join a tour of your resorts sustainability project, such as their organic gardens to see how they are decreasing their reliance on imported goods.
- Help your child become a Junior Marine Biologist as they are mentored by the Maldives Underwater team of marine biologists, head out into the water with snorkels to understand how the resort is protecting its local habitats.

Impact and Sustainability:

- **Marine Conservation:** the resorts we select see themselves as guardians of the precious marine environments in which they are set, and have pledged to protect the biodiversity and habitats surrounding their resorts.
- **Environmental Levy:** some properties have introduced a small levy on client's stay that is then invested in a number of projects that have a positive environmental, social and economic impact.

Carbon off-setting via Choose

The CHOOOSE platform provides tools for integrating climate action into any customer experience through automated emissions calculations, dynamic sustainability scores, climate program reporting, and a vetted marketplace of carbon removals, sustainable aviation fuel (SAF), and offsets.
